

Project Design Phase-II Data Flow Diagram & User Stories

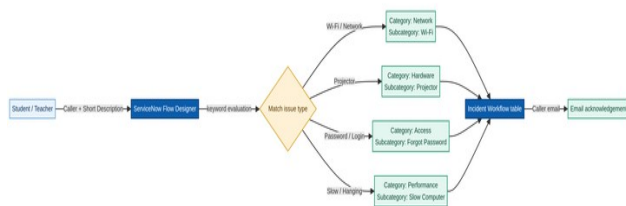

Date	31 January 2025
Team ID	Not specified in project brief
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagram: School IT Ticket Classification

This DFD shows how a school IT support request moves from the caller through Flow Designer keyword evaluation into a structured Incident Workflow record and an email acknowledgement.

Project data flow and user stories

Example: DFD Level 0 (Industry Standard)

User Stories

The following stories translate the project requirements into testable work items for the school IT helpdesk automation.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Student / Teacher	Ticket intake	USN-1	As a student or teacher, I can submit my Caller and Short Description so an IT ticket is created.	A record is created in Incident Workflow with an auto-number.	High	Release 1
Student / Teacher	Classification	USN-2	As a student or teacher, I can describe a Wi-Fi, projector, password, or slow-computer issue in plain language.	Flow Designer identifies the keyword and assigns the expected Category and Subcategory.	High	Release 1
IT Helpdesk Agent	Routing	USN-3	As an IT agent, I can see standardized Category, Subcategory, State, Assigned Group, and Assigned to values.	The record contains consistent choice and reference data for routing.	High	Release 1
IT Helpdesk Agent	Dependent choices	USN-4	As an IT agent, I can use Category-dependent Subcategory values.	Only valid mappings are available: Network/Wi-Fi, Hardware/Projector, Access/Forgot Password, Performance/Slow Computer.	High	Release 1
Student / Teacher	Notification	USN-5	As a caller, I receive an email after my request is submitted.	Email is sent to Caller → Email with a ticket confirmation subject and body.	Medium	Release 1
Administrator	Configuration	USN-6	As an administrator, I can maintain the no-code Flow Designer conditions and update set.	The flow is active, the Project Update Set captures changes, and XML export is available.	Medium	Release 2
IT Helpdesk Agent	Validation	USN-7	As a tester, I can verify Wi-Fi and Projector scenarios end to end.	Category, Subcategory, and email results match the configured keyword rules.	High	Release 1
Customer Care Executive						
Administrator
