

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	Not specified in project brief
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements: School IT Ticket Classification

The proposed solution uses ServiceNow Flow Designer to classify school IT tickets at creation time, route them consistently, and notify the caller.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket intake	Capture Caller, Short Description, Description, State, Assigned Group, and Assigned to in the Incident Workflow table.
FR-2	Automatic classification	When a record is created and Category is empty, evaluate keywords and assign Category and Subcategory.
FR-3	Dependent choices	Restrict Subcategory values according to Category: Network/Wi-Fi, Hardware/Projector, Access/Forgot Password, Performance/Slow Computer.
FR-4	Caller notification	Send an automated email to Caller → Email after ticket creation and classification.
FR-5	Agent routing and status	Store standardized ticket data, support assignment fields, and maintain states: New, In progress, On hold, Resolved, Closed.
FR-6	Deployment portability	Package the configuration in the Project Update Set and export it to XML for reuse.

Non-functional Requirements: Maintainable ServiceNow Automation

The solution must remain easy to maintain, reliable for daily helpdesk use, secure for school users, and scalable as ticket volume increases.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The caller needs only Caller and Short Description to submit a request; classification is automatic.
NFR-2	Security	Use role-based ServiceNow access so only authorized staff can view or modify ticket records and configuration.
NFR-3	Reliability	Keyword rules must produce consistent Category/Subcategory values and avoid duplicate auto-numbers.
NFR-4	Performance	Classification should occur during record creation without requiring manual refresh or agent intervention.
NFR-5	Availability	Use the ServiceNow platform and active Flow Designer flow so the helpdesk process is available during school operations.

NFR-6	Scalability	Use configurable no-code conditions, standardized fields, and update sets so new issue types can be added safely.
