

Project Design Phase
Solution Architecture

Date	15 February 2025
Team ID	Not specified in project brief
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Solution Architecture: ServiceNow School IT Ticket Automation

The architecture bridges the school helpdesk problem and a maintainable ServiceNow solution. It uses a ticket form, Incident Workflow data, Flow Designer keyword logic, dependent choices, and email notification.

- Find a platform-native solution that reduces manual categorization.
- Describe the record, flow, data, and user interactions for project stakeholders.
- Define the features and configuration needed for the first release.
- Provide implementation specifications for a secure, reusable, and scalable no-code workflow.
